EDUCATION

Boston College, Newton, MA May 2027
Bachelor of Arts in Computer Science, Minors in Finance and Philosophy

- Cumulative GPA: 3.7/4.0
- Activities: 4Boston Volunteering, Computer Science Society, South Asian Association, Intramural Flag Football
- Relevant Coursework:
    - Operating Systems, Computer Networks, Computer Systems, Randomness and Computation, Game Theory
    - Corporate Finance, Investments, Financial Accounting, Renewables Finance

EXPERIENCE

Boston College, Newton, MA Aug 2026 - Present
Teaching Assistant, Computer Networks

- Hold office hours and grade assignments for 40 students in Computer Networks
- Built a grading script that flags the location and type of each error, cutting grading time per assignment from 6+ hours to about 1 while keeping manual review and written feedback

Student Leader, Complex Problems

- Co-lead a 9-student reflection section for a 6-credit freshman course on corporations and climate change
- Plan class sessions with the course's two professors in a weekly leadership seminar
- Serve as a BC Link peer mentor, checking in on freshmen's first semesters and acting as a go-to student resource

Northrop Grumman, Annapolis, MD June 2026 - Aug 2026
Software Engineer Intern, Mission Systems

- Built a Python tool using an LLM API to translate natural-language scenario descriptions into structured JSON parameters, populating a custom AFSIM template to auto-generate and run simulation scenarios
- Cut scenario setup from a couple of hours to minutes by replacing hand-coded AFSIM scripting with a conversational terminal interface

Northrop Grumman, Annapolis, MD June 2025 - Aug 2025
Systems Engineer Intern

- Designed and implemented a data pipeline using Telegraf and PostgreSQL, and built a Grafana dashboard for real-time visualization
- Simulated sensor activity by generating mock protobuf data in Python to validate pipeline functionality

Recreation and Parks, Howard County, MD June 2024 - Aug 2024
Camp Leader

- Instructed children aged 6-13 in outdoor sports, including kayaking, canoeing, archery, and fishing

PROJECTS

Asteroid Miner (Roblox Game) - Game Developer / Product Lead June 2026 - Present
https://krishkalra19.github.io/gamedev-studio-site/#/

- Lead a 4-person team building a Roblox space-mining game using Roblox Studio and Lua
- Playtested competing Roblox tycoon games to set feature priorities and the team roadmap
- Rebalanced a two-currency economy after playtests showed Credits made Energy irrelevant, reworking the core loop so Energy powers ore machines whose output sells for Credits
- Redesigned pickaxe progression into ore-gated tiers after playtests showed upgrades swinging between overpowered and not worth crafting

NFL Predictor - Machine Learning Oct 2026 - Present
https://krishkalra19.github.io/nfl-predictor/

- Built a Python pipeline that pulls NFL play-by-play and roster data weekly and trains a 5-model ensemble (logistic regression, gradient boosting, MLP and Siamese neural networks) to output win probabilities
- Picked 66.3% of winners on 1,218 held-out games, beating an Elo baseline by 2.4 points and finishing within 1 point of Vegas without using betting lines as an input

SKILLS

Languages: Python, Java, JavaScript, SQL, Lua, HTML/CSS

Tools & Libraries: PyTorch, scikit-learn, pandas, NumPy, Git, Claude Code, MCP, Ollama, Roblox Studio, LaTeX
